

SHOW TIME / CHAPTER 3 / MUSIC WEEK

Thematic Learning Plan

Theme: Inspired by Axebug Space Adventure, students will explore creativity, self-expression, and interdisciplinary learning through music, visual arts, and interactive activities. They will design custom T-shirts, perform karaoke, express themselves through fashion, and engage in a hands-on milkshake-making activity.

Interdisciplinary Approach: English, Mathematics, Science, Visual Arts, Music

Core Skills:

Creativity and Innovation: Designing and painting T-shirts with Axebug, dung beetles, or ladybugs.

Collaboration and Teamwork: Performing karaoke and participating in group activities.

Communication Skills: Expressing themselves in English through performance and discussion.

Artistic Expression: Creating wearable artwork and engaging in musical performances.

Practical Application: Measuring ingredients and following a process in milkshake-making.

1. Defining the Theme and Introduction (Exploration Phase)

Objective: Introduce Axebug Space Adventure and the theme of Music Day, connecting music, art, and hands-on learning.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Science: Discuss the role of beetles and insects in nature, relating them to Axebug, dung beetles, and ladybugs. Explore how colors and patterns in nature can be used in design.

Mathematics: Introduce measurements and proportions for making milkshakes. Discuss symmetry and patterns in T-shirt designs.

English: Learn music and performance-related vocabulary (e.g., “melody,” “lyrics,” “stage presence”). Practice sentence structures for describing performances and clothing choices.

Visual Arts: Introduce the painting activity, showing examples of Axebug and beetle designs. Discuss how to create bold and expressive art on fabric.

Music: Discuss the impact of music on emotions and self-expression. Listen to different music genres and identify rhythms.

Student Involvement:

Brainstorm their favorite insects and how they could incorporate them into T-shirt designs. Discuss their favorite singers and music styles, preparing for the karaoke session

2. Deepening Knowledge (Research and Discovery Phase)

Objective: Explore the relationship between music, self-expression, and visual creativity.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Science: Study the role of vibrations and sound waves in music production.

Mathematics: Explore proportions and ratios when creating symmetrical T-shirt designs. Use fractions and multiplication for milkshake ingredient measurements.

English: Research and write about a favorite singer or music genre. Learn how to introduce and describe a performance in English.

Visual Arts: Practice sketching beetle-themed designs on paper before painting on T-shirts.

Music: Discuss the structure of a song (verse, chorus, bridge). Choose songs for karaoke and analyze their lyrics.

Student Involvement:

Experiment with sound waves using simple science activities.

Measure and mix ingredients in groups, planning the perfect milkshake recipe.

3. Product Design and Planning (Planning Phase)

Objective: Plan their T-shirt designs, song choices, and milkshake recipes.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Visual Arts: Finalize T-shirt designs and plan color combinations. Learn techniques for painting on fabric.

Mathematics: Use rulers and measurements to ensure their designs are symmetrical and well-proportioned. Convert measurement units for milkshake preparation.

Science: Discuss color mixing and how different pigments interact on fabric.

English: Write a short speech to introduce their karaoke performance, using expressive language.

Music: Rehearse karaoke performances and practice stage presence.

Student Involvement:

Assign tasks within teams (who prepares milkshakes, who sets up the karaoke, who paints first).

Share and discuss their design ideas before painting.

4. Product Implementation (Production and Application Phase)

Objective: Paint T-shirts, perform karaoke, and make milkshakes.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Visual Arts: Paint Axebug, dung beetles, or ladybugs on T-shirts. Encourage bold, creative designs.

Mathematics: Measure and mix ingredients for milkshakes, ensuring accurate proportions.

Science: Observe how liquids change in consistency when blending ingredients.

English: Describe their T-shirt designs in English, using descriptive language.

Music: Perform karaoke as individuals or groups, focusing on pronunciation and rhythm.

Student Involvement:

Work on their T-shirts while enjoying their milkshakes.

Perform karaoke in groups, supporting each other with applause and encouragement.

5. Presentation and Sharing (Showcase Phase)

Objective: Showcase T-shirts, perform songs, and celebrate their creativity.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

English: Present their T-shirt designs and explain their creative choices in English.

Visual Arts: Display all T-shirts for a class gallery walk.

Mathematics: Reflect on the accuracy of their milkshake ingredient measurements.

Science: Discuss what they learned about colors, sound, and mixing ingredients.

Music: Host a mini-concert where each student or group performs their chosen song.

Student Involvement:

Walk around and appreciate each other's designs.

Reflect on their performance and share what they enjoyed the most.

6. Evaluation and Feedback (Evaluation Phase)

Objective: Assess students' creativity, teamwork, and engagement.

Disciplines: English, Mathematics, Science, Visual Arts

Activities:

Science: Evaluate how effectively students applied their knowledge of sound waves and color mixing.

Mathematics: Review calculations and conversions made for their milkshake recipes.

English: Provide feedback on their speaking and presentation skills.

Visual Arts: Assess the creativity and execution of T-shirt designs.

Student Involvement:

Reflect on their strengths and areas for improvement.

7. Reflection and Conclusion (Reflection Phase)

Objective: Reflect on the learning experience and celebrate their achievements.

Disciplines: English, Visual Arts

Activities:

English: Write a short reflection about the experience, including what they learned and what they would do differently.

Visual Arts: Share thoughts on their artistic choices and the inspiration behind their T-shirt designs.

Student Involvement:

Discuss their favorite moments from the day.

Give peer feedback on performances and designs.

Conclusion:

This thematic learning plan provides students with a hands-on, performance-driven experience that integrates creativity, self-expression, and interdisciplinary learning. Through painting, music, and hands-on activities, students actively engage with academic concepts while enjoying a memorable and immersive Axebug Space Adventure experience. The final products—custom T-shirts, karaoke performances, and collaborative milkshake-making—serve as meaningful representations of their learning, encouraging confidence, teamwork, and artistic expression. Teachers can observe not only academic growth but also social and emotional development, making this a highly rewarding experience for both educators and students.
