

SHOW TIME / CHAPTER 4 / GANGSTER WEEK

Thematic Learning Plan

Theme: Inspired by Axebug Space Adventure, students will explore the adventurous and strategic world of “Gangster Day” by engaging in creative storytelling, teamwork-based challenges, and problem-solving activities. Through role-playing, interactive word games, and hands-on cooking, students will experience an immersive, interdisciplinary learning environment

Interdisciplinary Approach:

English, Mathematics, Science, Visual Arts, Music

Core Skills:

Problem Solving: Finding hidden word/question cards and solving clues.

Collaboration and Teamwork: Playing “Partners in Crime” and working together in the cooking activity.

Communication Skills: Expressing ideas in English and using deductive reasoning to identify “Bossroach.”

Artistic Expression: Designing gangster-style outfits inspired by Axebug Space Adventure.

Practical Application: Measuring ingredients and preparing spaghetti outdoors.

1. Defining the Theme and Introduction (Exploration Phase)

Objective: Introduce Axebug Space Adventure and the “Gangster Day” theme, linking it to strategic thinking and teamwork.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Science: Discuss the history of insects and survival strategies in nature, relating them to how gangsters strategize. Introduce the concept of camouflage and deception in nature.

Mathematics: Introduce probability and statistics by discussing the likelihood of finding hidden word cards in a set time frame.

English: Teach crime-related vocabulary (e.g., “clue,” “detective,” “partner in crime,” “hideout”) and practice sentence structures for questioning and guessing.

Visual Arts: Design gangster-style accessories such as hats, masks, and Axebug-themed badges.

Music: Introduce jazz and blues music, discussing their historical connection to the gangster era.

Student Involvement:

Brainstorm about famous fictional gangsters and compare them to the secretive world of Axebug Space Adventure.

Encourage students to come dressed as gangsters and take on character roles for the day.

2. Deepening Knowledge (Research and Discovery Phase)

Objective: Enhance problem-solving, teamwork, and creativity through immersive role-playing and strategy-based activities.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Science: Discuss the chemistry of cooking pasta and how starch affects its texture.

Mathematics: Introduce basic measurements for cooking spaghetti, using ratios for ingredient portions.

English: Assign students roles (e.g., “Detective,” “Bossroach,” “Informant”) and provide them with English dialogue prompts to use during the game.

Visual Arts: Sketch and plan gangster-style clothing designs, drawing inspiration from Axebug Space Adventure.

Music: Listen to old-school jazz or blues while discussing its impact on the gangster culture of the past.

Student Involvement:

Work in teams to find hidden word/question cards in the garden, competing to solve the most clues.

Discuss the importance of secrecy in games like “Bossroach” and relate it to storytelling techniques.

3. Product Design and Planning (Planning Phase)

Objective: Plan outfits, food preparation, and gameplay strategies.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Visual Arts: Finalize designs for their gangster-themed outfits, adding creative elements to reflect Axebug Space Adventure.

Mathematics: Convert ingredient measurements for cooking spaghetti, ensuring correct proportions.

Science: Discuss the biology of digestion and how carbohydrates provide energy.

English: Plan how they will communicate during the “Partners in Crime” game, practicing phrases such as “Where did you find the clue?”

Music: Select background music to create an immersive “Gangster Day” atmosphere.

Student Involvement:

Organize tasks for preparing spaghetti and set up the search game.

Assign a secret “Bossroach” and explain the rules, ensuring all students stay in character.

4. Product Implementation (Production and Application Phase)

Objective: Engage in hands-on activities, from cooking spaghetti to playing immersive games.

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

Visual Arts: Wear gangster outfits and create Axebug-themed crime scene sketches.

Mathematics: Measure and mix ingredients accurately while cooking spaghetti.

Science: Observe chemical changes in pasta while boiling and discuss how heat affects food.

English: Play “Partners in Crime,” searching for clues and forming sentences in English to describe what they find.

Music: Play jazz and blues music in the background, encouraging students to move in rhythm while playing their roles.

Student Involvement:

Prepare and enjoy spaghetti in the garden while staying in character.

Work as teams to gather the most hidden word/question cards.

5. Presentation and Sharing (Showcase Phase)

Objective: Share discoveries, showcase outfits, and reveal the “Bossroach.”

Disciplines: English, Mathematics, Science, Visual Arts, Music

Activities:

English: Engage in a discussion to guess the secret “Bossroach” based on collected clues.

Visual Arts: Display sketches and crime scene reports related to their gangster roles.

Mathematics: Discuss measurement errors or successes in cooking spaghetti.

Science: Reflect on the cooking process and discuss digestion-related concepts.

Music: Perform a short gangster-themed rhythmic chant or movement to music.

Student Involvement:

Vote on the best-dressed gangster, the best problem-solving team, and the best detective.

The “Bossroach” reveals themselves at the end of the activity.

6. Evaluation and Feedback (Evaluation Phase)

Objective: Assess engagement, teamwork, and interdisciplinary learning.

Disciplines: English, Mathematics, Science, Visual Arts

Activities:

Science: Evaluate knowledge gained about digestion and food science.

Mathematics: Reflect on their ability to measure accurately during spaghetti preparation.

English: Assess language skills used during the search game and character role-playing.

Visual Arts: Review creativity in costume and sketch designs.

Student Involvement:

Discuss challenges faced while solving the clues.

Answer reflection questions such as, “What was the most exciting part of Gangster Day?”

7. Reflection and Conclusion (Reflection Phase)

Objective: Reflect on the experience and discuss takeaways.

Disciplines: English, Visual Arts

Activities:

English: Write a reflection on their experience as a gangster for a day.

Visual Arts: Illustrate their favorite moments from Gangster Day in a comic-strip format.

Student Involvement:

Share final thoughts on their performance in the games and what they would improve next time.

Discuss strategies they would use if they played “Bossroach” again.

Conclusion:

This Axebug Space Adventure-themed **Gangster Day** encourages students to step into a role-playing experience that integrates problem-solving, teamwork, and academic learning in a fun and immersive way. By dressing as gangsters, solving hidden word mysteries, playing the role of “Bossroach,” and preparing spaghetti together, students are able to apply interdisciplinary skills in an engaging, hands-on setting. The performance-driven nature of this plan ensures that students not only absorb knowledge but also develop critical thinking and social interaction skills. Teachers can assess both academic and soft skill development in an enjoyable and memorable format, making this an effective and engaging thematic learning experience.
